

Transforming Businesses with SAP Business One on HANA

Pennant Engineering has been manufacturing high-quality steam related products and has left its footprint across the globe. Their continual quest for quality ensures that their solutions not only meet the rigid international standards but often surpass it. They provide robust products, and excellent consultancy services, adding to their reputation of reliability and loyalty to customers.

Expectations from SAP

- > Automate complex business processes to help people overcome manual inefficiencies
- > On-time delivery of orders with minimum inventory
- > Cloud-based ERP solution for ease of management and data security
- > Easy and real time data accessibility and visibility across the supply chain
- > Hour-to-hour report of order status
- > A local ERP solutions provider for better communication

Why SAP Business One and Inecom

- > Robust and comprehensive ERP system on Cloud
- > Customisations, add-ons, and portals as per our requirements
- > Customer and vendor portals
- > B1iF development – Auto emails

After: Value Driven Results

- > Faster order fulfilment with better inventory control
- > Improved visibility across supply chain
- > Hour-to-hour tracking of order status
- > Efficient creation of Sales Orders and clearance of GRPOs via portals
- > Real time data visibility (24x7) to Customers and Suppliers through portals
- > No more backlogs

Inecom delivered solutions in an efficient, and in a transparent way. They are always available to make necessary changes to improve operations. Their ticketing system gives a fast resolution to everyday operational issues. They brought us a solution which improved our supply chain management.
